# Spesifikasi Produk

## Product Specification

| Unit Tangki / Tank Unit               |                            |                                                                                              |
|---------------------------------------|----------------------------|----------------------------------------------------------------------------------------------|
| Kapasitas Tangki                      | <i>Capacity</i>            | 15.5 L Liter                                                                                 |
| Panjang                               | <i>Length</i>              | 361 mm                                                                                       |
| Lebar                                 | <i>Width</i>               | 210 mm                                                                                       |
| Tinggi                                | <i>Height</i>              | 503 mm                                                                                       |
| Bahan                                 | <i>Material</i>            | HDPE                                                                                         |
| Berat Kosong                          | <i>Empty Weight</i>        | 4 kg                                                                                         |
| Berat Isi                             | <i>Full Weight</i>         | 19.5 kg                                                                                      |
| Lebar Sabuk Gendong                   | <i>Strap Belt Weight</i>   | 35 mm                                                                                        |
| Unit Selang & Pipa / Hose & Pipe Unit |                            |                                                                                              |
| Panjang Selang                        | <i>Hose length</i>         | 1300 mm                                                                                      |
| Diameter Selang                       | <i>Hose Diameter</i>       | 13.52 mm                                                                                     |
| Panjang Pipa                          | <i>Pipe lance Length</i>   | 562 mm                                                                                       |
| Bahan Selang                          | <i>Hose Material</i>       | Karet / Rubber                                                                               |
| Bahan Pipa Penyemprot                 | <i>Pipe Lance Material</i> | Stainless Steel                                                                              |
| Unit Nosel / Nozzle Unit              |                            |                                                                                              |
| Jumlah                                | <i>Quantity</i>            | 3                                                                                            |
| Type                                  | <i>Type</i>                | Nosel Tunggal / Single Nozzle<br>Nosel 4 Lubang / 4 Holes Nozzle<br>Nosel Kipas / Fan Nozzle |
| Tekanan Kerja                         | <i>Spray Pressure</i>      | 3.5 - 5 (kg/cm <sup>2</sup> )                                                                |
| Debit Semprot                         | <i>Spray Discharge</i>     | 0.82 - 2.18 (l/min)                                                                          |
| Sudut semprot                         | <i>Spray Angle</i>         | 85° - 108°                                                                                   |
